THEY'RE CALLED LEATHER ACCESSORIES BUT WE CALL THEM NECESSITIES

MADE IN THE U.S.A.

Tory Leather Company was established in 1976 as a manufacturer of products for the Equestrian Industry. Because the items we manufactured are used on horses, the strength, looks and durability are important factors so we choose Wickett and Craig Tannery's Old World English Bridle Leather to make our products. Our English Bridle Leather products are all cut from a single piece of steer hide that is Environmentally Friendly in that it is tanned in vegetable extracts for long lasting character, drum dyed to obtain deep, uniform color and hot stuffed with oils and wax so that it is durable and will look and feel better with age.

Tory is one of the few manufacturers left in the United States who uses American Leather and American Craftsmen in the making of our products . We are trying to do all that we can to promote MADE IN THE U.S.A. and the GREEN quality of our products.
